"Strategic Implementation Lead & Senior Developer with a proven track record of delivering high-performance HR ecosystems for major MNCs. I specialize in bridging complex business logic with optimized technical architecture. Seeking a long-term role to drive operational excellence and sustainable value through my combined technical and management expertise."

Summary of Experience

VIETIN SOFT Co., Ltd - Software Engineer

12/06/2023 - 09/05/2026

Project Management & Implementation Lead:

- End-to-End Implementation:** Orchestrated the full-lifecycle implementation of Paradise HR software for 10+ major corporate clients, including multinational giants such as **Lotte** (~3,000 employees), **Nidec Advanced Motor** (~4,000 employees), **Haiphong Steel Flower** (~300 employees), **Detmold Packaging** (~2,000 employees), **Lichien Paper Product** (~300 employees), and **Tripod Vietnam** (2 factory ~4,000 employees)... Successfully managed systems serving a combined workforce of over **14,000+ employees/end-users**, ensuring seamless integration with diverse business ecosystems.
- Business-to-Technical Translation:** Acted as the strategic bridge between stakeholders and technical teams, translating **150+ intricate HR business rules**—including complex Payroll formulas, Core HR, Social Insurance, Timekeeping, Hiring, Performance Evaluate, and Training...—into precise technical specifications, reducing requirement gaps by **20% - 30%**.
- Project Governance & Delivery:** Defined project roadmaps and optimized resource allocation to maintain a **90% success rate**. Consistently delivered complex modules within **15-20 days/modules**—significantly faster than the standard **20-25 day/modules** requirement—while staying within **+/- 5%** of the initial budget.
- Quality Assurance & Client Relations:** Achieved **90% - 95% system stability** during peak payroll periods, helping clients automate manual workflows and reduce administrative processing time by up to **50%**. Earned high commendations for logic accuracy, directly contributing to a **100%** client retention rate.

Software Development & System Architecture

- Custom SPA Framework Development:** Engineered a proprietary Single Page Application (SPA) framework using Vanilla JavaScript, eliminating heavy dependencies to **achieve sub-second** initial load times and a **40%** reduction in bundle size compared to traditional frameworks.
- High-Performance UI Engineering:** Architected complex components, including virtual scrolling and recursive tree views, capable of rendering **10,000+ nodes** smoothly at **60 FPS** while maintaining a minimal memory footprint.
- Full-Stack Ecosystem Ownership:** Led the development of the Paradise HR ecosystem and the "Vào Ca" mobile-web application. Optimized shift-management logic to handle high-concurrency requests, ensuring 100% data integrity for thousands of daily check-ins.
- Database Architecture & Optimization:** Designed robust SQL Server schemas to manage millions of audit logs and massive HR datasets. Optimized T-SQL queries and stored procedures, reducing complex report generation time from minutes to seconds.

Education

Saigon University - Software Engineer

09/2019 - 11/2023
